CALL FOR ABSTRACTS

paste/ perst/ n.

- 1 a mixture of flour and water, used for sticking paper.
- 2 any material or preparation in a soft mass: a toothpaste.
- 3 Colloq. to beat and scold someone.
- 4 [Paste 2011 - the evolution of paste technology](#)

Paste and thickened tailings technology is increasingly being adopted in operations around the world to improve the stability and safety of tailings storage facilities and to minimise the potential for environmental impact. The ACG is a leading provider of P&TT education and technology for the mining industry. This is through its series of international seminars on P&TT and resultant proceedings, state-of-the-art publications, and industry sponsored tailings mine worker training DVD.
